

dideoxynucleoside, an immunomodulator, erythropoietin, ampligen, thyomodulin, thymopentin, foscarnet, ribavirin, or an inhibitor of HIV binding to CD4.

92. A combination according to claim 90, wherein said agent is an acyclic nucleoside, an interferon, a renal excretion inhibitor, a nucleoside transport inhibitor, a 2',3'-dideoxynucleoside, an immunomodulator, erythropoietin, ampligen, thyomodulin, thymopentin, foscarnet, ribavirin, or an inhibitor of HIV binding to CD4.

93. An article of manufacture comprising:
a first amount of (-)-*cis*-4-amino-1-(2-hydroxymethyl-1,3-oxathiolan-5-yl)-(1H)-pyrimidin-2-one or a pharmaceutically acceptable salt thereof, wherein the content of the (+)-enantiomer of said compound or of said pharmaceutically acceptable salt present in said first amount is no more than 5% w/w, relative to the combined weight of the (-) and (+)-enantiomers thereof, and
a second amount of another agent having antiviral activity.

94. An article of manufacture according to claim 93, wherein said first amount contains (-)-*cis*-4-amino-1-(2-hydroxymethyl-1,3-oxathiolan-5-yl)-(1H)-pyrimidin-2-one.

95. An article of manufacture according to claim 93, wherein said agent is an acyclic nucleoside, an interferon, a renal excretion inhibitor, a nucleoside transport inhibitor, a 2',3'-dideoxynucleoside, an immunomodulator, erythropoietin, ampligen, thyomodulin, thymopentin, foscarnet, ribavirin, or an inhibitor of HIV binding to CD4.

96. An article of manufacture according to claim 94, wherein said agent is an acyclic nucleoside, an interferon, a renal excretion inhibitor, a nucleoside transport inhibitor, a 2',3'-dideoxynucleoside, an immunomodulator, erythropoietin, ampligen, thyomodulin, thymopentin, foscarnet, ribavirin, or an inhibitor of HIV binding to CD4. --
